[in LinkedIn](#)

Summary

AI Agent Engineer with hands-on experience in Python, Django, machine learning, and security automation. Skilled in building intelligent systems, bots, and data-driven applications, with a growing track record in freelancing and real project delivery. Passionate about creating practical AI solutions, cybersecurity tools, and automation that solve real problems

Experience

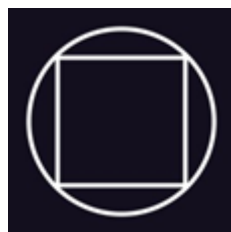

Freelancer / Jan 2022 - Present

AI and Autonomous Application Development

https://mostaq.com/u/Dev_Osama

- Designed and developed AI applications to solve real-world problems, enhancing user experience and operational efficiency.
- Collaborated with clients to understand requirements and deliver tailored AI solutions.
- Performed debugging, troubleshooting, and testing of AI models to ensure optimal performance.

Master Coding Specialist (Arabic) – AI Trainer (Contract)

Invisible Technologies / Dec. 2025 - Present

- Train and evaluate AI models by reviewing code, debugging logic, and improving code quality.
- Provide coding expertise across Python, web development, and algorithmic tasks.
- Create high-quality data, test cases, and feedback to improve model accuracy and performance.
- Support Arabic-language coding tasks and ensure technical clarity in both English and Arabic.

Education

Delta University for Science and Technology

Oct 2022 – Jul. 2026

B.S. in Artificial Intelligence/ Cybersecurity

GPA: 3.2/4.0

Projects

Red Teaming AI Agent

Established an **automated AI agent** that ran continuous simulations of cyber threats, enhancing system defenses and directly contributing to a 25% reduction in successful phishing attacks reported by users over a three-month period.

[Papers & Researches](#)

[Github](#)

WhatsApp Clinic Agent

- Created an intelligent patient management system using NLP techniques for automated interactions.
- Developed functionality to retrieve and display patient data on doctor dashboards in real-time.
- Implemented WhatsApp messaging API integration for patient communications.
- Built a responsive interface showing patient status and medical history for healthcare providers.

[Download ZIP file](#)

ML Phishing URL Detection System

Developed an intelligent phishing detection system powered by machine learning, analyzing URL patterns, domain authenticity, and IP data to accurately uncover and prevent cyber threats.

Courses & Certifications

Nvidia DLI Summer Training Program From ITI *Information Technology Institute (ITI)*

Building LLM Applications With Prompt Engineering

[Certifications Link](#)

Building Agentic AI

Learned with Andrew Ng how to build, test, and evaluate Agentic AI workflows.

[Certification Link](#)

25+ courses completed from Coursera

In 2022–2023, Delta University’s Faculty of Artificial Intelligence partnered with **Coursera** to offer free access to **paid** courses. I used this opportunity to study key technologies from top instructors and strengthen my technical skills.

[Certifications Link](#)

Skills And Frameworks

Machine Learning

- Python (NumPy, Pandas, Scikit-learn)
- TensorFlow, PyTorch
- Data preprocessing, Model training & evaluation

Agentic AI & LLM

- LangChain, OpenAI API, Ollama, n8n
- Tool calling, memory, multi-agent systems
- Prompt engineering & workflow automation

Programming

- Django, Flask, FastAPI, REST APIs, SQL, PostgreSQL, MySQL, HTML, CSS, JavaScript
- Git, GitHub, CI/CD basics
- Docker fundamentals
- System design fundamentals

Problem Solving & Soft Skills

- Critical thinking, teamwork, adaptability
- Communication, leadership, project management

Various Projects & Freelance Work

Team Leader / Developer

– Led team projects with clear task distribution and collaboration.
